CCTV

The
Partnership
For
Success

www.oakforduk.com

As an official Axis Communications partner Oakford Technology can offer the latest in PC based closed circuit television. Once installed footage can be viewed from any location, including from a remote site, when using the correct security details.

These modern day CCTV systems are used within your computer network and can be either wired or wireless. As the footage is stored on a server, multiple days of your CCTV footage can be saved and backed up giving you a hugely secure and scalable CCTV system.

IP CCTV systems are becoming more and more popular in a wide range of industries. From schools and colleges to hotels, pubs and clubs.

A full range of installation, support and management services are available with these systems and a pre-installation site survey is highly recommended.

If you would like a demonstration of our CCTV systems or wish to discuss how it could fit within your existing system please contact your reseller or Oakford Technology on the details above.
