

## LAPTOP RECHARGE TROLLEY

The  
Partnership  
For  
Success

www.oakforduk.com

Laptop Trolleys provide a simple, cost effective classroom solution. Each trolley can recharge laptops plugged into it and provides physical security using the locked door.

A printer and wireless router can be attached ensuring that you have a complete, portable ICT suite in a box.

Complete with a fully welded chassis, castors for mobility, foot operated wheel locks and locking doors. Each unit comes complete with an integrated power board into which the laptop ac adaptor is plugged. This means there is no restriction on the type of laptop or ac adaptor which can be used. The power board is located within a lockable compartment in the base of the unit and is complete with air vents for the reduction of excess heat produced when charging.

The Laptop Trolleys are available in different sizes - 8, 10, 12, 16, 20, 24 and 30 Bays.

By special order they can also be supplied with a logo and in a variety of different colours.

If you would like a free demonstration of a laptop trolley or wish to discuss how it could fit within your existing system please contact Oakford Education on the details above.

**Other options including servers, maintenance visits and thin client systems are also available please contact our School Consortium department on 01249 658666**
