Fun, Easy to use, Interactive Teaching Tool

Meet the world's first multitouch, multiuser table for primary education. The SMART Table interactive learning centre lets students get hands-on with collaborative activities – and the more hands the merrier.

The SMART Table is a versatile learning centre where groups of students can create, explore and discover together on the durable screen. The interface is so intuitive that even the youngest child can play games and plunge into learning activities in no time.

Students can sweep shapes across the screen, stretch out their favourite animal and play matching games with partners. Many of the activities are built specifically to encourage collaboration, so students learn to come to a consensus as they explore. You can choose from a wide variety of ready-to-go lesson activities, or customize them to suit your own lessons.

Features

- 27" diagonal screen
- DViT technology, enabling multi-touch
- Integrated audio
- Truly mobile with fully lockable castors

If you would like further information or wish to discuss how it could fit within your organisation please contact Oakford Technology Ltd using the details above
