ULTRA MOBILE LAPTOP TROLLEY

The Partnership For Success

www.oakforduk.com

Laptop Trolleys provide a simple, cost effective classroom solution. However a traditional laptop trolley does not suit all schools as it is only easily portable over one floor on one site.

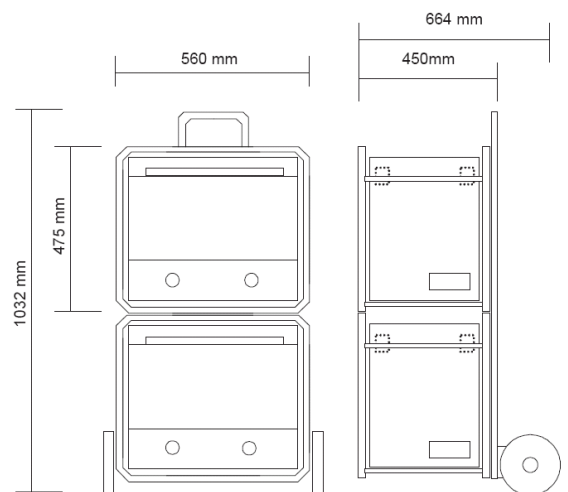

With the Ultra Mobile laptop trolley you get two laptop boxes that will each hold and charge five laptops. These two boxes are housed in a sac truck style mobility case providing easy movement on wheels. Both boxes can be removed from the mobility case with easy enabling transportation over multiple floors or sites.

Each compartment contains a recharging facility and lockable lid. Other options include the addition of wireless network connectivity .

By special order the Ultra Mobile trolley can be supplied with a logo and in your school/college colours.

If you would like a free demonstration of a laptop trolley or wish to discuss how it could fit within your existing system please contact call Oakford Education on the details above.

Other options including servers, maintenance visits and thin client systems are also available please contact our School Consortium department on 01249 658666

Weight: 25kg
